Drug recognition evaluation report/narrative

1: **Location:** The evaluation was conducted that the Washington County Sheriff's office in the processing room.

2: **Witness:** The evaluation was witnessed by Officer Fleury of the Barre City Police Department.

3: **Breath Test:** [REDACTED] provided a sample of his breath with a Preliminary Breath Test result of .000% BrAC at approximately 2135 hours.

4: **Notification/Interview of A/O:** Officer Fleury of Barre City Police Department was requesting a DRE after stopping Siergiey for speeding in Barre City. I spoke with Officer Fleury by phone while he was still on the traffic stop. He advised [REDACTED] was traveling thirty seven miles per hour in a posted twenty five miles per hour zone. At the time of operation, it was snowing and the roadways were snow covered. Officer Fleury stated [REDACTED] performed poorly on Standard Field Sobriety Exercises and provide a sample of his breath with a result of .000% BrAC. Officer Fleury stated he obtained consent to search the vehicle from [REDACTED] and located marijuana in the vehicle.

5: **Initial Observations:** I first observed [REDACTED] sitting in the processing room at the Washington County Sheriff's office. I noted his eyes were bloodshot and watery and I detected an odor of burnt marijuana filling the room.

6: **Medical Problems:** No injury or illness was observed.

7: **Psychophysical Tests:** On the Modified Romberg [REDACTED] exhibited eye lid tremors and body tremors throughout the exercises. On the One Leg Stand, [REDACTED] counted slowly reaching twenty three in thirty seconds and used his arms for balance while standing on his left foot. While standing on his right foot, [REDACTED] counted slowly reaching twenty two in thirty seconds and swayed while balancing. He exhibited body tremors throughout the exercise. On the Finger to Nose exercise, [REDACTED] failed to touch the tip of his nose with the tip of his finger in numbers two, three, four, and five.

8: **Clinical Indicators: EYES:** [REDACTED] pupils were of equal size and he was able to follow a stimulus. I noted his eyes were bloodshot and watery. He had markedly reddened conjunctiva. His pupils were above normal size in room light and direct light conditions and at the high end of normal in near total darkness. [REDACTED] exhibited a lack of convergence. [REDACTED] was unable to perform the lack of convergence exercise with his glasses on because they were broken and they were in his vehicle. **VITAL SIGNS:** [REDACTED] pulse rate was above normal on all three readings at 108, 118 and 118 bpm. His blood pressure was at the high end of normal at 140/88. [REDACTED] body temperature was above normal at 99.5 degrees.

Drug recognition evaluation report/narrative

9: **Signs of Ingestion:** [REDACTED] had a greenish film on his tongue and his uvula dark red. I detected and odor of marijuana on his breath. The inside of his nose was red.

10: **Statements:** [REDACTED] stated he smoked two bowls of marijuana approximately forty five minutes before being stopped for speeding. [REDACTED] stated he purchased a "slice" or eighth ounce of marijuana and it usually lasts approximately two weeks. He stated he smokes marijuana three or four times a week.

11: **Opinion of Evaluator:** In my opinion, [REDACTED] was under the influence of Cannabis and was unable to operate a motor vehicle safely.

12: **Toxicological Sample:** [REDACTED] was transported to Central Vermont Hospital to draw a sample of his blood. The results are pending.

13. **Miscellaneous:** I am a Nationally Certified Drug Recognition Expert since July 2008.

Miscellaneous Toxicology Analysis Report

Laboratory No.(s), 10EB 160

Receipt Date: 01/06/10

Submitter: Jason Fleury

Agency: Barre City Police

Address: 15 4th Street

Town: Barre State: VT

Zip: 05641

Sample Description: 10 ml test tube of blood
from donor [REDACTED]

Case No. 09BA08315

Analysis Requested: Cannabinoids

Result[s] of analysis:

Cannabinoids by GC/MS	Result	Reporting Limit
Delta-9 THC	<2.0 ng/ml	2.0 ng/ml
Delta-9 Carboxy THC	21.7 ng/ml	5.0 ng/ml
Delta-9 Hydroxy THC	<5.0 ng/ml	5.0 ng/ml

Laboratory Notes:

Marijuana is a DEA schedule 1 Hallucinogen. The main psychoactive ingredient is Delta-9 THC. During smoking Delta-9 THC rapidly leaves the blood, dropping below detectable levels within several hours. The active metabolite, Delta-9-Hydroxy THC may also fall below detectable levels shortly after inhalation. Delta-9-carboxy THC is an inactive metabolite of Delta-9-THC.

Reporting Limit is set by VDH Lab and does not reflect levels of impairment.

This is a public record. Information contained in this record may be used for statistical purposes, and may be released upon request, pursuant to Vermont access to Public Documents Law (1. V.S.A. 315 -320.) Results relate only to the items tested. This report shall not be reproduced, except in full, without the written approval of the Laboratory.
